

WAVE™ ONCLOUD PUSH TO TALK COMMUNICATION SERVICE

INSTANT TEAM COMMUNICATIONS

WAVE™ OnCloud is a Push-to-Talk (PTT) communication service that connects phones, computers and radios together easily and affordably so your enterprise teams can communicate instantly – improving business operations and elevating service.

YOUR DEVICES ON YOUR WIRELESS CARRIER

Your workers can use the devices they already own; smartphones, tablets, radios or PCs. The WAVE OnCloud service is also carrier agnostic, so there is no need to switch devices or networks. It works on public or private 3G/4G cellular or Wi-Fi™ network with Internet access, which means you're not locked into a single provider.

COMPATIBLE WITH ANDROID™ AND APPLE® DEVICES

Since the WAVE Oncloud is a software service that resides in the cloud you simply set up an account at **waveoncloud.com**, download the app from your phone's app store and start communicating. The service is compatible with standard mobile phones.

CONNECT MOTOTRBO™ TO THE CLOUD SERVICE

Add a small gateway to your MOTOTRBO system and enable seamless communications between broadband devices and two-way radios. Securely communicate among talkgroups, initiating group calls, individual calls and text messages.

FEATURE RICH SERVICE ALL FROM ONE APP

Enable instant and secure communications with smart device, two-way radio or computer. Extend your workforce communication to anywhere you have mobile broadband access on your existing devices with your existing broadband service provider.

PRIVATE/GROUP VOICE CALLS

Instant PTT to talkgroups and individuals over broadband – 3G, 4G, Wi-Fi

PRIVATE/GROUP TEXT

Send and receive text messages from team members

CALL HISTORY

Review past calls and texts made for workflow management

PRESENCE INDICATOR FOR CONTACTS

See which team members are online

REAL-TIME LOCATION MAPPING

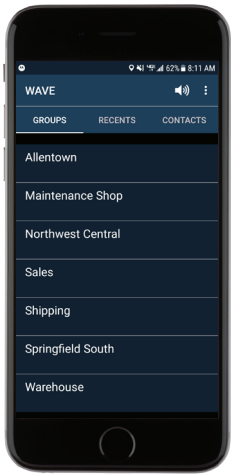

Identify the location of individuals to coordinate operation

SECURE COMMUNICATIONS

End-to-end encryption keeps your communication secure

WAVE MOBILE COMMUNICATOR

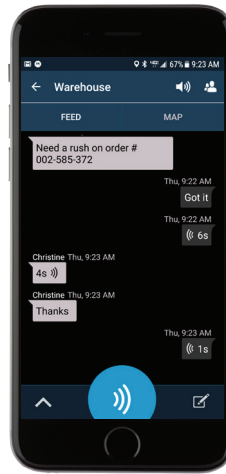

Turn your Android or iOS smart device into a multi-channel PTT handset with the WAVE Mobile Communicator.

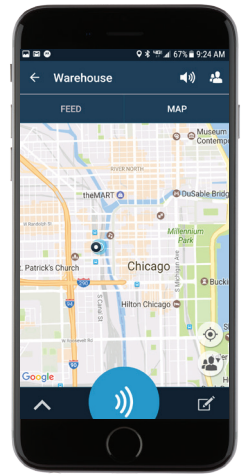

SELECT TALKGROUP

PRESS THE PTT BUTTON

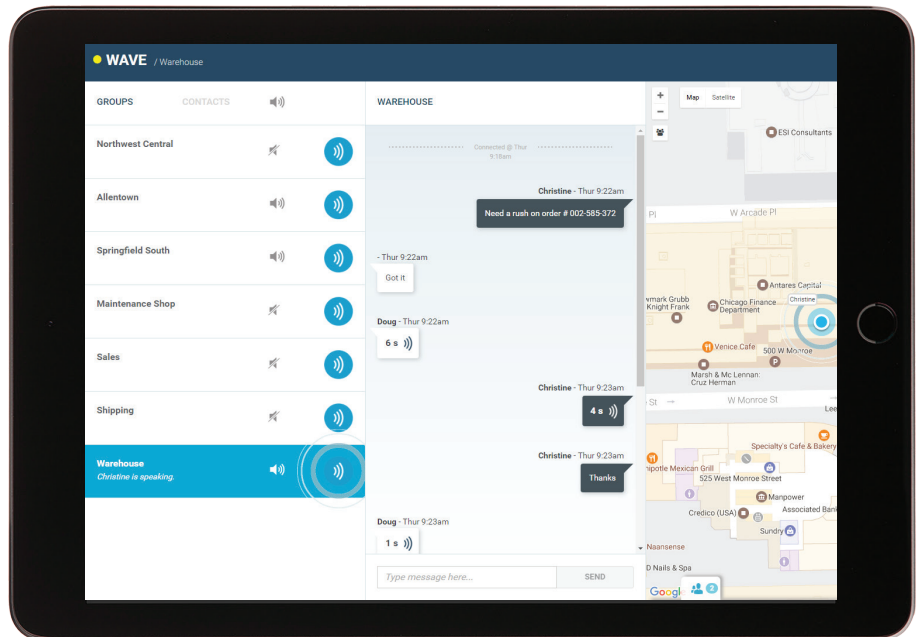

SEE HISTORY

VIEW LOCATIONS

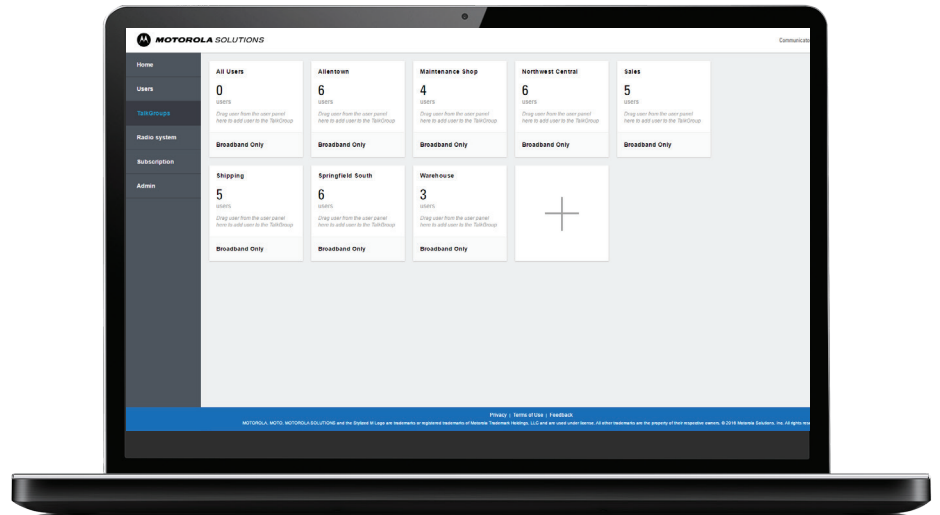

WAVE WEB COMMUNICATOR

With a web browser, users can login anywhere and communicate with their team members and co-workers.

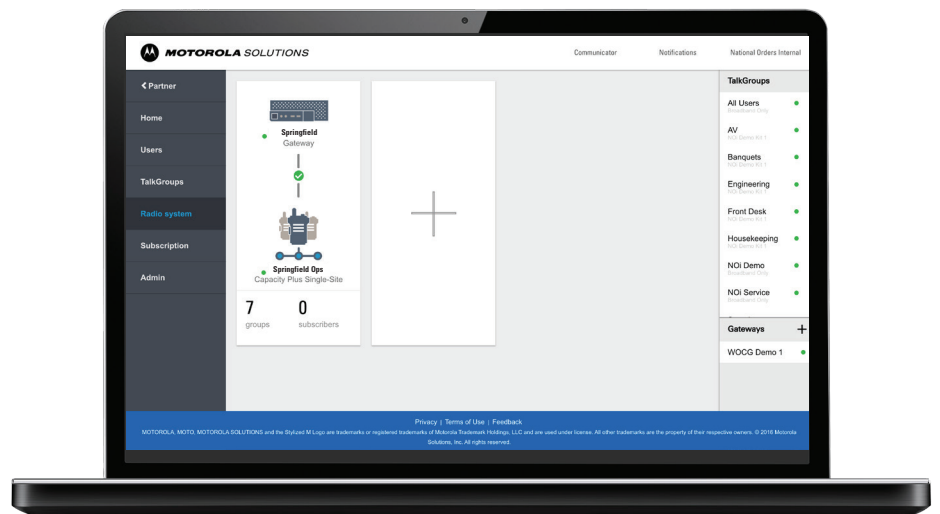

SETUP IS EASY TO DO

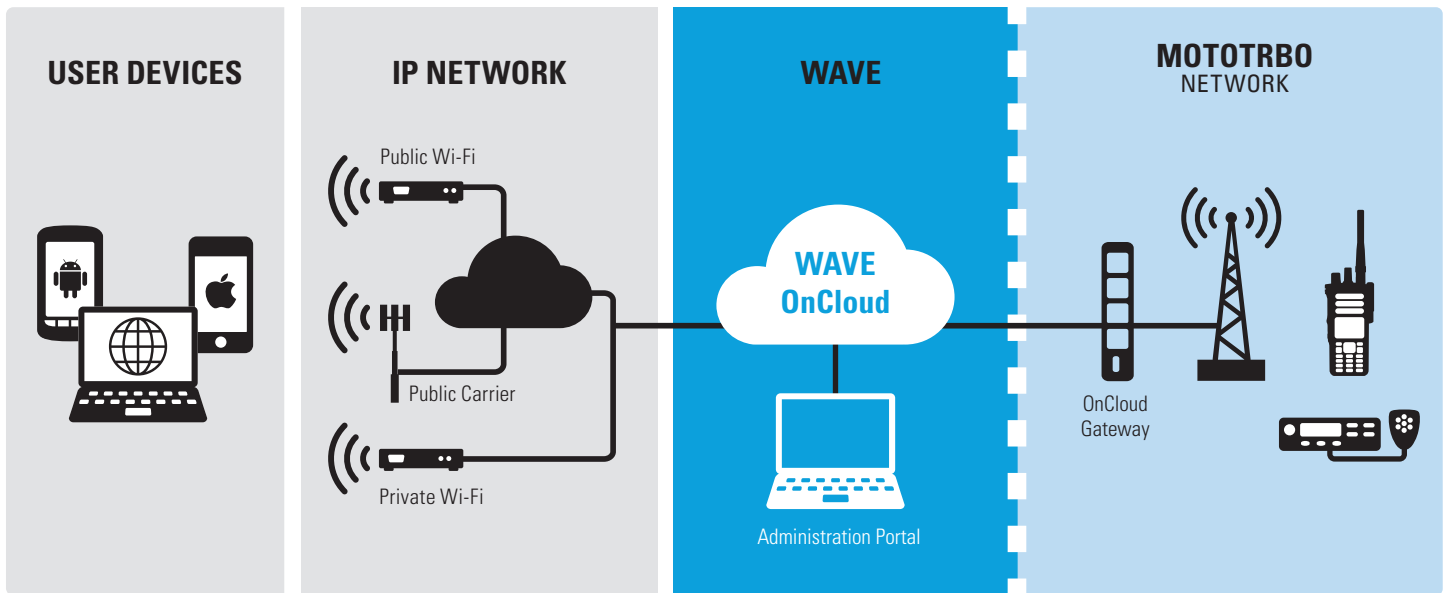

From an Internet connected browser setup your WAVE OnCloud Service in a matter of minutes through the Administrator portal. Add/delete users, drag and drop users into talkgroups, use existing radio talkgroups.

Quickly set up and manage users and talkgroups.

Connect your MOTOTRBO radio system to the WAVE Oncloud Service.

SERVICE PLANS

BROADBAND ONLY SERVICE

Connect to the WAVE OnCloud service using mobile phones, tablets and laptops from anywhere with public broadband service. Keep your team connected wherever they call their office.

MOTOTRBO AND BROADBAND SERVICE

Unify communications across radio and broadband users and eliminate communication barriers between the traditional office space and the commercial and industrial areas.
